

February 25, 2016

Greetings:

My name is Dr. Kuldeep Rawat and I am the Department Chairman of Technology and Aviation Science at Elizabeth City State University. ECSU has been educating minds, building character and improving the quality of life for our area of the country and wherever our graduates go. We achieve our commitment to the highest quality education by maintaining a rigorous focus on academic excellence using innovative and flexible technology-based instruction models to enhance our signature areas: integrating technology with education, improving human health and wellness, and advancing the natural and aviation sciences.

As the home to The University of North Carolina's only Bachelors in Aviation Science degree program, we play an important role in strengthening our states presence in the future of aviation. The aviation program at Elizabeth City State University offer students a comprehensive education in their chosen aviation area of study. Moreover, the curriculum offers general education and liberal arts courses that are intended to help students broaden their perspectives about themselves and their careers while, at the same time, giving them the knowledge and confidence to be successful in the competitive fields of aviation and aerospace. Aviation students have a range of aviation program options from which to choose. The program offers a Bachelor of Science degree in Aviation Science with minors in Aviation Management, Air Traffic Control, Avionics and Flight Education. We are currently developing curriculum to support and research Unmanned Aerial Systems (UAS) technology in preparation for what promises to be the next rave in aviation.

Enclosed please find copies of our latest flyer (Have You Dreamed of Flying an Airplane). This flyer was designed specifically to inform high school students of their option to enter into the exciting world of Aviation Science. Because we are a North Carolina supported institution, we can provide this education opportunity to your student's at the most affordable rate in the country. I am asking you to **please prominently display our flyers at your facility.**

Kuldeep S. Rawat, Ph.D.
Department Chair &
Director of Aviation Science Program

HAVE YOU DREAMED OF FLYING AN AIRPLANE?

DID YOU KNOW YOU CAN RECEIVE
COLLEGE CREDIT IN HIGH
SCHOOL? ARE YOU INTERESTED IN
MORE INFORMATION ABOUT OUR
AVIATION SCIENCE PROGRAM?

AT ECSU, WE CAN MAKE AN *Aviator* OUT OF YOU!

The Aviation Science program at Elizabeth City State University is the only four-year aviation education program offered in the State of North Carolina. As the State of North Carolina was the "first in flight," the Aviation Science Program is the first in aviation education for the University of North Carolina System and for the State of North Carolina.

Students enrolled in a Dual Credit program may apply credits earned in high school towards their degree. This gives the student a great advantage by completing general education courses ahead of time. In turn, transferring these credits would allow for more classes and completing degree requirements earlier.

Aviation students have a range of aviation program options from which to choose. The program offers a Bachelor of Science degree in Aviation Science with specialization in:
